The ELRUS Factory Rebuild Facility repairs most makes and models of crushing and screening equipment including: Sandvik, Metso and Cedarapids and everything from reduction boxes on conveyors to complete crushing plants.

We have highly qualified service specialists with in-depth knowledge of our equipment and industry specific expertise to help you maximize production. The department consists of heavy-duty mechanics, welders, millwrights and machinists and our facilities are comprised of fully equipped bays incorporating overhead cranes of 5 to 25-ton capacity.

Our Machine Shop has Horizontal and Vertical boring capacity to handle Jaw Crushers tup to o 54" opening and a 96" table with traceability to refurbish Cones of any make or model. The machine shop manufactures and repairs replacement eccentric shafts up 32" diameter x 12ft for jaws, screens and Vibrating Grizzly Feeders.

We offer 24-hour service for replacement parts and on-site repair assistance wherever your location.
