Control Vans

Increase Production • Improve Site Safety

Reduce Exposure to Silica and Airborne Contaminants

ELRUS Control Vans & Towers provide a 360° view and complete control of your spread. A centralized operating station has been shown to improve production by as much as thirty percent and offers the added benefit of improved safety for everyone onsite.

CONTROL TRAILER OPTIONS

Fuel Tank Drainage Pump

Model #GPI 133200-1 M-3120
115 Volt AC Motor, Vane Type
76 L.P.M., 20 gallons, UL listed, CSA Approved
3/4" x 25' Hose
Manual Nozzle Installed

Windshield wipers

Power pack
3 switches
3 wiper arms and blades

Walk-a-round Platform

Vacuflow system

Electric Space Heaters

Self-contained Composting Toilet

Cab Pressurization Unit

A combination air pre-cleaner with VLR air filter system removes large particles with a built in centrifugal pre-cleaner. Air is then filtered and blown in with a self contained air pump. The clean air is blown into the cab creating a positive pressure which prevents dirt from entering the cab through leaks in its doors and other spaces.
