Control Towers

Available in hydraulic raise & lower for installation in control/power vans and pull-trailers or stationary for fixed applications.

By providing a 360° view and complete control of your spread, ELRUS Control Vans & Towers can significantly increase production. A centralized operating station offers the added benefit of improved safety for everyone onsite.

Whether you need a full control van and tower or are looking to install a pop-up or stationary tower with an unbeatable view, there is an ELRUS tower that will improve your site safety and efficiency.

POP UP TOWER FEATURES

Designed with health and safety in mind

Control towers can be mounted inside power vans or on pull trailers that can be pulled with a pick up truck are the heart of the crusher control centre. They are raised and lowered using a 12-volt hydraulic scissor lift and are pin-locked within the tower mounting frame once in the operating position.

Control Tower Features:

- Full 360° view of the crushing spread
- Climate control for operator comfort
- Plenty of room for control panel, phone, computer controls etc.
- Simple hydraulic raise and lower for travel or security
- Rear access (escape) full glass door & aluminum floor hatch
- Wired for lights, air conditioning, heat and accessories
