Since its founding in 1975, **ELRUS Aggregate Systems** has been a leading name in the aggregate and mining industries, specializing in the design and manufacture of portable processing and handling systems. With a reputation for quality and innovation, ELRUS serves customers across Canada and the United States, providing comprehensive solutions tailored to meet their unique needs.

OUR EXPERTISE INCLUDES:

- Portable crushing and screening equipment to deliver efficient, high-performance solutions.
- Conveying systems designed for reliability and optimal operation.
- A robust inventory of replacement parts and dedicated customer support to minimize downtime and ensure smooth operations.

WHAT SETS ELRUS APART:

- **Uncompromising quality:**
Every piece of equipment is built to last, delivering the durability and performance our customers expect.
- **Customer-driven solutions:**
We prioritize your success, offering tailored systems to optimize your operation.
- **Ethical business practices:**
We pride ourselves on fostering trust and long-term relationships with our customers and partners.

ADDITIONAL SERVICES:

- 24/7 customer support to address urgent needs and minimize downtime.
- Custom equipment design and layout tailored to your project's requirements.
- Fuel savings and operational efficiency analysis to maximize your bottom line.

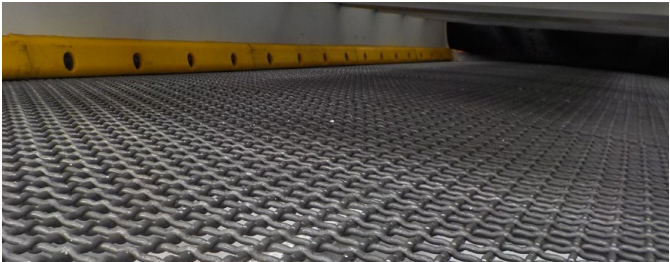

SCREEN MEDIA

Optimize your screening efficiency with ELRUS high-performance screen media. Available in a range of materials, sizes, and configurations, our solutions deliver precision, durability, and long life. Whether handling high-impact or fine materials, ELRUS screen media ensures superior classification and minimal downtime to keep production moving.

WOVEN WIRE:

ELRUS woven wire screen media offers exceptional wear resistance and flexibility across various applications. Precision-crafted to endure tough conditions, it delivers accurate material separation and extended service life, improving operational efficiency.

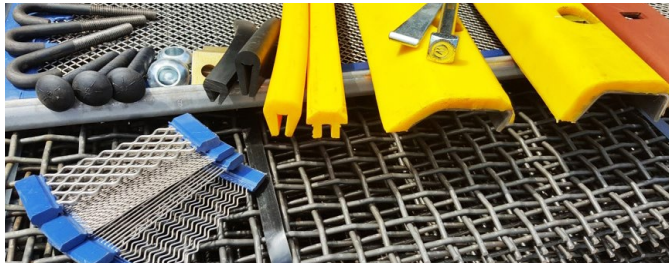

CUSTOM SOLUTIONS:

No two operations are alike. ELRUS provides tailored screen media solutions to fit your specific equipment and material flow needs. Our custom options maximize screening efficiency and minimize downtime, helping you get the most from your operation.

ENGINEERED SCREENS:

Designed for demanding applications, ELRUS engineered screens use advanced materials and technology to reduce blinding, pegging, and wear. These high-performance screens ensure consistent output and long-term productivity in the most challenging environments.

SCREEN ACCESSORIES:

Support optimal screen performance with ELRUS screen accessories. From tensioning systems to rubber buffers and clamps, our components are built to enhance efficiency, reduce maintenance, and extend media lifespan.

CONVEYOR PARTS

Efficient material handling is critical to your operation, and ELRUS conveyor parts are built to keep things moving. From rollers and idlers to pulleys and belts, we stock premium components designed for demanding aggregate environments. Count on us to maintain smooth, consistent output and reduce costly maintenance interruptions.

BEARINGS:

ELRUS supplies high-performance bearings engineered to handle heavy loads and the constant demands of aggregate production. Built for durability and low friction, our bearings support reliable conveyor operation and minimize downtime.

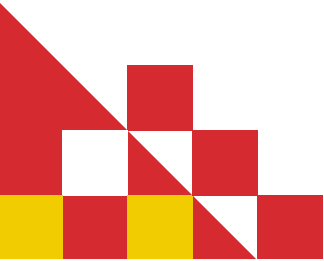

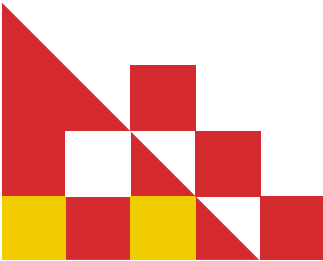

MOTORS & GEARBOXES:

Power your conveyor with robust motors and gearboxes from ELRUS. Designed for efficiency and long service life, these components deliver consistent performance under pressure—keeping your system running at optimal speed.

ROLLERS & PULLEYS:

Get the most from your conveyor system with ELRUS rollers and pulleys. Built to endure tough conditions, they ensure proper belt tracking and steady material flow, helping reduce wear and operational delays.

CRUSHER WEAR PARTS

Protect your crusher and enhance performance with ELRUS high-durability wear parts. Engineered for maximum impact resistance and extended wear life, our components are built to withstand the toughest aggregate processing conditions. From liners to blow bars and everything in between, we supply a full range of parts for any crusher type—keeping your equipment productive and protected.

JAW LINERS:

ELRUS jaw liners are built for performance and durability. Precision-fit and highly wear-resistant, they're designed to handle demanding applications with minimal downtime. Rely on our jaw liners to extend service life and maintain efficient crushing.

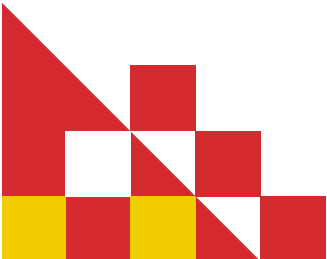

CONE LINERS:

Our cone liners deliver long-lasting performance under heavy-duty conditions. Designed to resist impact and abrasion, they improve material flow and reduce wear, helping your crusher operate at peak efficiency with lower operating costs.

WEAR PREVENTION:

Extend the life of your equipment with ELRUS wear prevention solutions. We offer protective components and wear-resistant materials tailored to your crusher setup. From custom liners to high-performance wear solutions, we help reduce maintenance needs and keep your operation running smoothly and cost-effectively.

OEM SANDVIK PARTS

When only genuine parts will do, trust ELRUS to supply OEM Sandvik components. As an authorized distributor, we provide authentic parts built to Sandvik's exact specifications—ensuring peak performance, durability, and long-term equipment reliability. Choosing OEM helps maintain your crusher's integrity and minimizes the risk of premature wear or breakdown.

JAW PARTS:

Maximize your Sandvik jaw crusher's performance with OEM parts from ELRUS. Precision-engineered for perfect fit and strength, these components ensure reliable operation, extended wear life, and reduced downtime to keep you on schedule.

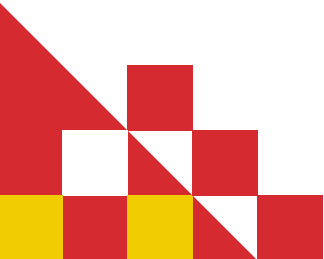

CONE PARTS:

Keep your Sandvik cone crusher running at top efficiency with OEM cone parts from ELRUS. Built for exact compatibility and long-lasting durability, our parts optimize crushing performance while helping minimize maintenance and operational disruptions.

OTHER PARTS:

From wear plates to hydraulic components, ELRUS offers a wide range of OEM Sandvik parts to support your system. Built to Sandvik's exact standards, they ensure reliable performance and smooth equipment integration. Count on ELRUS to keep your crushers running strong.

BRAND SUPPORT & CUSTOM SOLUTIONS

At ELRUS Aggregate Systems, we're proud to deliver solutions tailored to your operation. Our experienced team offers expert guidance on product selection, maintenance, and troubleshooting to keep your equipment performing at its best. We supply parts for any make or model—and can even reverse-engineer components—to help your operation run smoothly.

Every operation is unique, which is why we deliver custom solutions that fit your exact needs. Need a specific brand colour, design, or feature? We'll make it happen. From ergonomic, climate-controlled Control Vans to washing and screening systems built around your production goals, we adapt our equipment to meet your challenges—including containment and contaminant removal systems.

As your trusted partner, ELRUS works alongside you to enhance safety, performance, and productivity. Our custom-built systems give you complete control over your setup, ensuring every detail aligns with your goals. Contact us today to share your vision—together, we'll bring your ideal aggregate processing system to life.
