

SCREEN MEDIA

SCREEN MEDIA

Optimize your screening efficiency with ELRUS high-performance screen media. Available in a variety of materials, sizes, and configurations, our screen media solutions are designed to deliver precision, durability, and longevity. Whether you're working with high-impact or fine materials, our screen media offers superior classification and minimal downtime, keeping your production on track.

WOVEN WIRE:

Achieve superior screening performance with ELRUS woven wire screen media. Crafted with precision, our woven wire is built to endure demanding conditions, offering flexibility and high wear resistance for various applications. Count on our woven wire solutions to provide accurate material separation and extended service life, enhancing the efficiency of your operation.

CUSTOM SOLUTIONS:

Every operation has unique needs, and ELRUS is ready to provide tailored screen media solutions to meet them. Our custom solutions are designed to match the specific requirements of your equipment and material flow, maximizing efficiency and minimizing downtime. Rely on our expertise to deliver screen media that fits perfectly and performs exceptionally.

ENGINEERED SCREENS:

ELRUS engineered screens are designed for challenging screening applications, where precision and durability are paramount. Utilizing advanced materials and technology, our engineered screens deliver optimized performance, reducing blinding, pegging, and wear. These high-performance screens help ensure consistent output and greater productivity for even the toughest jobs.

SCREEN ACCESSORIES:

Optimize your screening process with ELRUS range of screen accessories. From tensioning systems to rubber buffers and clamps, our accessories are engineered to enhance performance, reduce maintenance, and ensure your screen media operates at its best. Keep your screens running smoothly and efficiently with our durable, high-quality accessories.
