

SERVICE

SERVICE

At ELRUS Aggregate Systems our dedicated Service Department is committed to supporting your operations with expert repair, maintenance, and technical solutions tailored to the aggregate industry. From conveyor reduction boxes to complete crushing plants, our team delivers dependable workmanship that keeps your equipment performing at its best. Our highly qualified specialists, including heavy-duty mechanics, welders, millwrights, and machinists, bring extensive product knowledge and hands-on industry experience to every project. Whether in-shop or in the field, our goal is simple: minimize downtime, maximize uptime, and help you maintain peak production.

FULL REBUILD SERVICES

Extend the life of your equipment with ELRUS Full Rebuild Services. Our experienced technicians manage complete restorations, from structural frame repairs to major component replacements. Every rebuild undergoes detailed inspections and precision workmanship to ensure it meets ELRUS's highest standards for performance, durability, and reliability. The result is equipment you can trust to deliver like new, built to withstand the demands of your operation.

ON-SITE SERVICE

When mechanical issues arise in the field, ELRUS is ready to respond. Our mobile service specialists arrive equipped with the tools, parts, and expertise needed to diagnose and resolve issues efficiently. From emergency breakdown support to preventative maintenance programs, we provide responsive, professional service designed to reduce downtime and keep your operation moving forward.

SPECIAL PROJECTS

Every operation has unique challenges, and ELRUS thrives on solving them. Our Special Projects team works closely with you to design and execute custom modifications, upgrades, and system enhancements that align with your production goals. With a collaborative approach and precision engineering, we deliver innovative solutions that improve safety, efficiency, and long-term performance.
